

From agricultural research & ecology studies to optimizing crop production, rugged HOB0 data loggers offer unparalleled ease-of-use and deliver exceptional reliability

HOB0 MX2308 Temp/RH/PAR Data Logger

High-precision monitoring of PAR, temperature, and humidity, for comprehensive insight into environmental conditions. Plus convenient wireless data offload via Bluetooth.

- Integrated LI-COR LI-190R PAR Sensor, the industry gold standard for light measurement
- Rugged, weatherproof design
- Easy data offload via Bluetooth and the free HOB0connect app
- Vapor Pressure Deficit (VPD) and Daily Light Integral (DLI) calculations
- User-replaceable battery that lasts up to 2+ years

Bluetooth MX Loggers

Accurate & reliable HOB0 MX series data loggers dramatically simplify field data collection with convenient wireless setup and data download via Bluetooth and the free HOB0connect app.

Temp/RH

The HOB0 MX2301A logger features integrated sensors and a compact, weatherproof housing with built-in mounting tabs for easy deployment.

Soil Moisture/Temp

The HOB0 MX2307 logger is designed with sharp stainless-steel spikes for easy installation in both mineral soils and soilless media.

2 External Temp Sensors

A weatherproof data logger featuring two external temperature sensors, the MX2303 delivers high-accuracy measurements.

Solar Radiation

An affordable, research-grade Temp/RH logger with integrated LI-COR pyranometer for solar radiation measurements.

Whether it's a stand-alone data logger, a weather station, or a wireless sensor network, you can count on HOB0 monitoring solutions to be:

- Highly accurate
- Easily deployed
- Affordable
