## Digital

Modern computerized workflows enable labor efficiencies and data accessibility

## Connected

Virtual slides streamline communication and simplify sharing processes

“As an early adopter of the PD-L1 immunostain methodology, our group quickly recognized the inter and intra observer variability in scoring and interpretation of the stain, especially when there is non-uniform staining among tumor regions. We have been very pleased with the added confidence that HiPath Pro provides us in improving accuracy and precision of interpretation.”

Dr. Lija Joseph, Lowell General Hospital
